

Electric City Barn HILLSIDE VIEW PROJECT CRAIG STREET • SCHENECTADY

Electric City Barn is an innovative hub where emerging artists, “makers” and community members collaborate on projects to bolster the creative economy and provide meaningful skill – building opportunities for local residents – a place where creativity works.

The Electric City Barn will provide opportunities for projects involving advanced tools and skills. It’s a place where knowledge, ideas, and creativity can be shared to enhance projects across several mediums: metal shop, wood working, fiber arts and clothing design, digital electronics, 3D printing lab, performance and community meeting space.

Thriving Neighborhoods CHALLENGE
